

UK flywheel energy storage project

Overview

Leveraging existing grid connected pilot scale battery systems in the UK and Ireland, the flywheel technology will be integrated to provide a novel hybrid solution, proving the unique energy storage system in an operational setting and laying the foundation for successful commercial exploitation by enabling maturity of the technology from TRL 6 through TRL 7 (system prototype demonstration in an operational environment) leading to achievement of TRL 8 (system complete and qualified) prior to commercialisation (TRL 9).
